Figure 1. A schematic diagram of the experimental design. The diagram shows a sequence of events: a subject is presented with a stimulus (a word or picture), then a response is recorded, and finally, the subject is presented with a feedback (a word or picture). The sequence is repeated for multiple trials, with the stimulus and response being different for each trial. The feedback is provided after each response. The diagram also shows a timeline of the experiment, with the stimulus and response occurring within a specific time window, followed by a feedback period. The timeline is divided into segments for stimulus, response, and feedback, with the total duration of the experiment indicated.
